Water Development Program May Depend on Decision Tomorrow

By RICHARD RICHARDS
State Senator

The meeting of the Joint Committee on Water Resources Development tomorrow may well be a decisive one as far as our immediate state-wide water policy is concerned.

This is an executive meeting, and in all probability it will determine whether or not a definite water program will be considered at a special session of the Legislature to be held concurrently with the Budget Session next February and March.

Those who have been following the water debate closely and reading the material that is being released by various groups throughout the state can scarcely be blamed if they are thoroughly confused at what has been taking place in recent weeks. This is hardly surprising in view of the positions taken by some of those who are immediately concerned in the solution of this problem.

California must be certain that any proposed solution bearing the stamp of our agreement is not grounded either upon politics or present expediency. Rather, it can only be one which serves Southern California and the rest of the state with complete fairness, and one that our people can live with, not only now but in future generations.

This analysis will apply to the economics of whatever project may be approved, whether it be the continuation of the Feather River Project or the development of North Coast sources.

No Solution

It is my feeling that there are a few legislators who are quietly dedicated to no solution at all. I am not in that group, and it is my belief that no Southern California representative is so inclined.

On the other hand, there are some who for political or personal reasons are anxious to push through a policy decision—any decision, good or bad—just so they can point to it as a personal accomplishment, real or otherwise. I am not in that group either, and I think there is a danger in the latter position almost as great as in the former.

Projects Eyed

In the present stage of proceedings, careful consideration is being given to the problem of whether each area of deficiency can be efficiently served in the future by the proposed Feather River Project, or whether it may be necessary to add a North Coast project.

If this proves necessary, it must then be determined whether it should be developed first or concurrently or subsequently.

Important Decision

It must be apparent that any solution reached cannot possibly be viewed as a mere temporary expedient, because its impact and ultimate effects will be felt by our people for all time to come.

For this reason, and because of the tremendous expenditures involved, we who represent the substantial areas of

And involved in this decision is the question of whether other quasi-independent agencies (comparable to the Metropolitan Water District) should be established with our southern support in other parts of the state.

Savings Firm Reports New Loan Record

Contrary to industry trends in recent months, American Savings & Loan Assn., with nine offices in the Greater Los Angeles area, announces a new high of \$121,413,000 in residential mortgage loans in their portfolio as of Nov. 30, 1957. Of this total, almost \$4,000,000 was recorded last month.

Important Decision

It must be apparent that any solution reached cannot possibly be viewed as a mere temporary expedient, because its impact and ultimate effects will be felt by our people for all time to come.

For this reason, and because of the tremendous expenditures involved, we who represent the substantial areas of

While "tight money" has restricted lending operations for some institutions, American Savings reports a growth in resources to over \$135,000,000 and reserves now total \$12,000,000.

NHS Honors 48 Students For Grades

Forty-eight seniors from North High School were honored last week for maintaining an average of "B" or better during their four years at the schools.

The 48 students honored represented 16 per cent of the 237 seniors. On the list were 18 boys and 30 girls.

Two boys, Ronald G. Hefnider and Bill Lee maintained a straight "A" average while the straight "A" record of Lelia Santor is marred only by a single "B."

Throughout 1957, American Savings' policy has been the continued support of economic and community growth by providing a stable source of mortgage loan funds. With headquarters in Whittier, American Savings also maintains offices in Montrose, Temple City, Azusa, La Puente, East Whittier, Norwalk, Redondo Beach and Manhattan Beach. Through a postage-free, save-by-mail program, funds are received by the institution not only from California savers, but from the entire United States and other countries throughout the world.

Other students honored were Anan Buichi, Glenn Yokoyama, Amy Akashi, Mary Ogawa, Eryls Davenport, James Warnemunde, Judy Nelson, Thomas Steinemann, Marjorie Towle, Bob Merry, Patricia, Kimble, Barbara Cage, Carolyn Bubbinski, Adelaide Garnica, Darel Krutinger, James Waddle, Mary Ann Schmitt, Betty Rustum, Judith Mathews, Sylvia Chase, and Diana Bybee.

STOPPING DISTANCE

Even with perfect brakes an automobile traveling 30 miles an hour cannot be stopped in less than about 100 feet.
